RECOMMENDATION LETTER FOR Mustafa OZVER,

Program: Graduate Programs

To whom it may concern:

I am writing this reference letter at the request of Mustafa OZVER who wants to continue his education in your university. I met Mustafa in 2013 during his bachelor degree education in Erciyes University. He took the 'Technical Foreign Language', 'Electromagnetic Fields Theory', 'Fundamentals of Nanotechnology' and 'Electronic Design and Application' modules from me. He passed all these modules successfully by setting a role model to his peers with his passion.

Based on his performance in the classes he took from me, Mustafa is a very intelligent young man with a promising career. He is a well – disciplined, organized and hard-working student. He proved his ability of understanding theoretical knowledge and practicing it. I also believe that creativity is a must characteristic for scientists and Mustafa also has it. He proved capability of combining his creativity with his practical knowledge in the 'Electronic Design and Application' module. He also proved his research skills in this module with the research he made on software of spectrometric analysis. He has good analysis skills and is good at finding reliable resources.

Moreover, I must also state that I am sure he is not going to have language based problems as he was also successful at 'Technical Foreign Language' module. He is also a very sociable person. Therefore, I am sure he is not going to have any problems with adapting to your country and university environment.

Please do not hesitate to contact me at turkmen@erciyes.edu.tr or +90 352 207 6666 / 32278 if you have further information regarding his qualifications.

Kind Regards,

Assoc. Prof. Mustafa Turkmen,
Department of Electrical and Electronics Engineering
